## **DETAILED ACTION**

This Office action is in response to application papers filed on 10 March 2004.

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-12, 28-37 are drawn to methods for manufacturing an integrated circuit, classified in class 438, subclass 257.
  - II. Claims 13-27 are drawn to an integrated circuit, classified in class 257, subclass 315.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process, such as a process wherein the metal line is formed

before the step of forming the first conductive gates, in which case at least some of the first conductive gates would always be electrically interconnected contrary to step (a) of claim 1.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
